Have Questions?

Customer Service Department:

Direct Line: 1-800-800-5804

Email: NTOACS@wm.com

On all emails: Please always give service address and full contact information:

Need to change the size of the container or the number of days you receive service?

CALL our customer service department! We can help.

Helpful Tips!

Reduce Odor: To help reduce odor around your waste area, remember to tightly bag your trash before placing it in your container. This will help to reduce bacteria build up and odor caused by spilled garbage.

Keep it clean: Regular cleaning of your container and the waste area surrounding the container will help to keep the waste area clean for easy access, reduce odor and minimize insects.

Placement of Container: Please ensure the overhead clearance is 14ft, do not place your container under low hanging wires and trim any tree limbs that may be blocking the route to the container also.

Corral Construction: Please call WM customer service for the details on what size you will need and how it should be placed; we have the details for you.
